March 2024

Southwest Milam Water Supply Corp. (SWMW) Members,

SWMW, your company, is currently very solvent. However, we know by example that some water supply providers experience financial difficulty when it becomes necessary to replace outdated infrastructure. Delaying a rate increase then falling behind financially and unable to replace old lines is what we choose not to do.

Your Board of Directors has evaluated SWMW’s needs, and determined it is necessary to increase the rates at this time in order to meet funding for line replacement projects and other increased costs. Our water system turned 50 years old in 2020, and while part of the original system has been replaced over the last 5-10 years, there is still a lot more to be done.

On behalf of your Board of Directors, we thank you for your membership with Southwest Milam Water Supply Corporation and for your continued support.

Sincerely,  
*Southwest Milam WSC*  
*Board of Directors*
